LOCAL ITEMS

Moonlight Mellos at Jacques' Drug Store, 50c lb.

Mr. Geo. Clemons has purchased a new Chevrolet truck.

Mrs. Bray left on Sunday for Medicine Hat, to take medical treatment.

Mr. Chas. Wylie, of Hanna, made a flying visit to Chinook on Tuesday last.

Mr. Wells, assistant at the depot here for some time past, has been transferred to Hanna.

Mrs. W. L. Butts will do Marcelling every Friday, at the home of Mrs. Homer Butts.

Mrs. Cooley is taking Miss Young's place in the post office while the latter is on her holidays.

Duncan Fisher, of Alaska, is doing carpenter work for Mr. Munford near Chinook this week.

Mr. Joe Massey has purchased the house owned formerly by Mr. F. O. Foster, and has moved into town.

Mr. John Duncan recently purchased a Graham Bros. truck in Calgary, and drove it back to Chinook.

Mrs. Sayers, with her two children, left on Sunday morning for Carstairs, to visit her mother, who is very ill.

Mrs. McGaw, of Bateman, Sask., who has been here visiting her sister, Mrs. L. Robinson, has also returned home.

McKenna, of Hanna, is the new assistant at the C.N. Mr. McKenna arrived on Monday to take up his duties.

Mrs. Stewart, who has been visiting her son, Mr. Richard Stewart, left for her home in Saskatoon on Monday.

Miss Margaret Young, of the Chinook Post Office, is at present enjoying a short holiday with friends in the country.

Mrs. H. H. Barnes, of Calgary, is visiting for a short time with her brother, Mr. Geo. Christopher, south of Chinook.

R. J. Martin, general relieving agent for the C.N.R., is in charge of railway affairs here during the absence of Mr. Elliott.

Mrs. J. McCall, of Youngstown is visiting for two weeks at the home of her sister-in-law, Mrs. N. D. Stewart, of Coliholme.

Mrs. Frederickstone, of Trail, B. C. who has been visiting her daughter, Mrs. Lloyd Robinson, returned to her home last Friday.

Norman E. Knott, of Hanna, representing the firm of Plunkett & Savage, Calgary, was calling on the business men of Chinook last Friday.

The Chinook Baseball Club is giving a grand dance in the School on Friday, October 21st. A four-piece Orchestra is engaged for the occasion.

Mr. and Mrs. O. B. Elliott and family left the first of the week for Toronto, for a visit with friends. Mr. Elliott is expected home about the first of November, but Mrs. Elliott will remain in the east some time.

The box social and dance at Laughlin school last Friday night was attended by a large crowd, and all report an enjoyable time. The boxes brought good prices at auction. The proceeds of this social and dance will go towards purchasing a piano for the school.

OUR WATER SUPPLY

The water supply in Chinook has for some time been a question that has caused serious consideration.

We have several wells in the town, some of which have been condemned as unfit for use. The water in these wells could be greatly improved and made fit for use by cleaning out the wells. This matter should be taken up by the council at once. No town or village the size of Chinook can get along without a supply of good water for household purposes. It is also necessary that we have a good supply of water, in case fire should start up at any time.

Therefore, one thing our council should take under serious consideration is the immediate cleaning of the wells and the repairing of all public pumps before the freezing cold weather comes. This work could be done at the present time more economically than after the cold weather starts, and this matter should be taken up at once. Let every citizen take an interest in this important matter, and let their influence be used before the council to have the wells cleaned out and put in good condition at once.

Another good move would be to have all lots cleaned up, all refuse drawn out to the public dumping ground, thereby giving our town an appearance that will be a pride to us all.

Mr. N. F. Marey recently purchased the smaller of the Foster houses in town, and moved it out to his farm east of town this week.

Mr. Kidney, of Edmonton, inspector of municipalities, was in Chinook on Wednesday, attending to his duties at the office of the clerk of M.D. of Coliholme.

Aitken Bros. threshed oats last week and the yield was 105 bus. to the acre. This is a record yield for this part of Alberta, so far as we have heard this season.

Mr. Crummy, Calgary, superintendent Pool Elevator Co.; Mr. Lundy, superintendent National Elevator, and Mr. Granoski, superintendent Pioneer Elevators, were Chinook visitors this week.

The Ladies' Card Club met this week at the home of Mrs. J. S. Smith. Mrs. Jacques had the highest score, winning a large box of beautiful stationery. The club meets next week at the home of Mrs. W. S. Lee.

Mr. David L. Smith left Monday morning for Drumheller, where he has accepted a position with the Bank of Commerce. His brother, Douglas, has accepted a position with the Bank of Commerce at Rosebud.

Oyen local returned men are going ahead with preparations for a grand banquet and reunion to all "returned men" between Youngstown and the Saskatchewan boundary, to be held in Oyen on Armistice night. Messrs C. Stewart, H. R. Chapin and Wm. Irvine have charge of the arrangements.

Automobile Accidents

During the Great War the statement was frequently made that human life appeared to be the cheapest of all commodities. Judging by reports appearing in the press daily of the continuing and steadily mounting toll of lives lost as the result of automobile accidents the old war-time statement would almost appear to be true today.

Deaths from automobile accidents as reported in vital statistics and by insurance companies now measure up in their totals to the figures credited to many of our more serious diseases. To these fatalities must be added the very large number of persons crippled and maimed for life as result of such accidents. The record is not one that reflects much credit upon our vaunted twentieth century civilization.

Responsibility for a very few of these fatal accidents can be laid at the door of defective construction of automobiles. Car construction has reached a high state of efficiency and great care is exercised by all manufacturers in the quality of materials used and in the excellence of workmanship in construction.

The vast majority of all automobile accidents are the direct result of foolhardy recklessness on the part of drivers of cars, or open disregard by them of the rights of other drivers and lack of respect for the laws and rules of the road.

Many drivers either fail to realize, or deliberately ignore the fact, that an automobile is a high powered machine, capable, because of its power and speed, of doing incalculable damage. The greater the power and speed of the car, the greater the danger, and the greater the need for the exercise of commonsense and caution. Too many drivers, however, because their car is capable of 50, 60, 70 or more miles per hour, feel impelled to drive it at that rate, quite ignoring the fact that a speed of which the car may be capable, and which may be comparatively safe on a clear, well-paved highway, is highly dangerous driving on the average earth road of Western Canada.

Then there is the road fool who because his car has the power, is afflicted with the insane mania of always striving to pass every other car and who seems to labor under the delusion that it is an insult to allow any car to pass him.

Again, there is the type, and a numerous type it is, which refuses to observe the automobile laws and rules of the road, takes the right-of-way from others entitled to it, and selfishly dashes along regardless of everybody else, and without giving the slightest consideration to the fact that, while he may get safely through, he may bring disaster upon less experienced or more nervously inclined drivers. Many, probably most, drivers give way and relinquish their rights to these roadbugs rather than invite an accident. But the roadbug can never be sure of this and an accident is the result.

Finally, there is the driver who rather than slow down and possibly wait a few seconds in safety at a railway crossing, or a dangerous curve in the road, speeds ahead. Many have saved a second or two only to be maimed for life or meet their death.

Legislators, road builders, car manufacturers, all are striving to devise ways and means of diminishing causes of accident. Roads are being built wider, with easier curves, less pitch to them, less pronounced ditches at the side, with guard rails at danger spots, warning signs, and a multitude of other devices. Legislators and others are seeking to evolve practical headlight and other traffic regulations. Manufacturers are exercising their ingenuity in the improvement of brakes and safety appliances. Still the death toll mounts higher and higher.

Why? There is only one answer. Because of a desire to boast of the performance of their car to achieve a momentary thrill, to travel at a totally unnecessary speed, in a word, to outdo somebody as foolish and reckless as themselves, people will hazard life and limb, not only their own but everybody's. Law officers are doing their best to protect a long suffering public, but they can only punish the offender; they cannot prevent the accident. Only an aroused public opinion, and a wider acceptance by all of the duties of responsible citizenship can remedy the evil and the loss to which attention is drawn.

A Motorist's Prayer

Teach us to drive through life without skidding into other people's business. Preserve our brake linings that we may stop before we go too far. Help us to hear the knocks in our own motors and close our ears to the clashing of other people's gears. Keep alcohol in our radiators and out of our stomachs. Absolve us from the mania of trying to pass the other automobile on a narrow road. Open our eyes to the traffic signs and keep our feet on the brakes.

Too many people know a lot of things that are none of their business.

Genuine
ASPIRIN

Proved safe by millions and prescribed by physicians for
Colds Headache Neuritis Lumbago
Pain Neuralgia Toothache Rheumatism

DOES NOT AFFECT THE HEART

Safe

Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 15 tablets also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monocarbonyl-acetic acid (Aspirin) Bayer, Ltd., S. A. While it is well known that Aspirin means Bayer, the Bayer name and logo on the Bayer package will be stamped with their general trade mark, the "Bayer Cross".

French Excursionists

"La Survivance Francaise" Excursion To Eastern Canada

French excursionists travelling to Eastern Canada under the auspices of "La Survivance Francaise" will leave Winnipeg at 3.00 p.m. December 17th by special train over Canadian Pacific Lines. This train will carry all steel modern electric lighted equipment, including compartment observation, dining, standard and tourist sleeping cars and day coaches. Special arrangements have been made to visit important religious and commercial centres in Eastern Canada, where receptions will be given. These include: Ottawa, Montreal, Shawinigan Falls, Quebec, Ste. Anne de Beaupre, Sherbrooke and other historic places.

Charles Marchand, the famous folk singer and entertainer, will accompany the special train from Winnipeg, and a real treat is in store for the excursionists.

A leaflet printed in French giving full particulars is now available and may be had on application to any Ticket Agent of the Canadian Pacific.

Paint a Corn With

This Marvel Liquid

The pain stops in a few seconds. Tight shoes won't hurt any more. The corn shrivels up, and drops off. Remove the whole corn and doesn't pain a bit. It's the sure remedy—Putnam's Corn Extractor. All druggists sell Putnam's Corn Extractor. Get your bottle today. Refuse a substitute for Putnam's.

Select Factory Sites

Large British Corporations Will Branch Out in Business in Canada

Six factory sites have been selected in Canada for the location of British industries, and further British development will follow the work of Theo. Felden, of London, England, director-general of the Empire Trade League and editor-in-chief of the Empire Mail. On his arrival in Winnipeg Mr. Felden stated that he had been commissioned by the Empire Trade League to look for sites for large corporations in England and had so far found six that were satisfactory.

IS THERE A BABY IN YOUR HOME?

Is there a baby or young child in your home? If there is you should not be without a box of Baby's Own Tablets. Childhood ailments come so quickly and means should always be at hand to promptly fight them. Baby's Own Tablets are the ideal home remedy. They regulate the bowels, sweeten the stomach, relieve constipation and indigestion; break up colds and simple fevers—in fact they relieve all the minor ills of little ones. Concerning them Mrs. Mabel Cabotte, Makinik, Que., writes: "Baby's Own Tablets are the best remedy in the world for little ones. My baby suffered terribly from indigestion and vomiting but the Tablets soon set her right, and now she is in perfect health." The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medical Co., Brockville, Ont.

Ship Produce To New Zealand
The first movement of British Columbia vegetables and fruit this season to New Zealand has begun with the shipment of 7,000 cases of onions and 4,500 boxes of apples to the Island Dominion.

Women and Asthma. Women are numbered among sufferers from asthma by the countless thousands. In every climate they will be found helpless in the grip of this relentless disease unless they have availed themselves of the proper remedy. Dr. J. D. Kellogg's Asthma Remedy has brought new hope and life to many such. Testimonials, sent entirely without solicitation, show the enormous benefit it has wrought among women everywhere.

No Forest Fires in Manitoba
There have been no forest fires in Manitoba this season, and now as the dry season is at hand, the fire patrol will be doubly vigilant to keep the record unbroken. Woodsmen and campers have co-operated with the Dominion and Provincial Governments to eliminate the cause of fires; the patrol officers say. Plans will be kept on duty until late in October.

B.C. Horses For Russia
Negotiations are proceeding through the Canadian Government for the sale of about a thousand more British Columbia horses by this province to the Soviet Government. The animals will be rounded up in the interior and routed via Montreal.

When a man gets a chance to dispose of his troubles he always heaps up the measure.

Relieves Sore Throat—Minard's Linctament.

Refractory Brick

Experiments To be Carried Out This Winter At Claybank, Sask.

With the aid of the Ceramics Department of the University of Saskatchewan the Dominion Fire Brick and Clay Products Co., Limited, of Claybank, Saskatchewan, hopes to be able soon to turn out a refractory brick, manufactured from Saskatchewan clays, which will be practically in a class by itself. Having this object in mind, the company has made arrangements with the University to have its ceramics engineer and assistant superintendent, Y. R. Anderson, spend the winter months at the local institution making a special study of refractories. Mr. Anderson, incidentally, was one of the first graduates from Saskatchewan in ceramics engineering. Since 1924 he has been employed with the Dominion Fire Brick Company.

International Grain Show

Saskatchewan Exhibitor Sends First Entry Of Marquis Wheat

James A. Paar, of Langham, Saskatchewan, has the honor of sending in the first entry for the International Grain and Hay Show, which will be held in Chicago, November 16 to December 3rd. He will exhibit a sample of Marquis wheat in the hard red spring class. In this class last year 16 of the 30 prizes were awarded to Canadian entries and the top sample, shown by Hermann Trelle, Wembley, Alberta, was later made grand champion of the show. Five additional prizes are being offered in this class at the International, and entries close November 10.

Ride In Luxury Car

A "luxury car" has ended a strike of village school children in Avro, England. Parents of the pupils objected to a tumble-down vehicle used to convey the children to and from Newnham School, four miles away. They kept their children at home. Finally, the Gloucestershire Education Committee provided a bus which is termed a "luxury car," and the children have gone back to school.

An Oil Without Alcohol.—Some oils and many medicines have alcohol as a prominent ingredient. A judicious mingling of six essential oils compose Dr. Thomas' Electric Oil, and there is no alcohol in it, so that its effects are lasting.

New Manitoba Highway
The opening of a new highway south of Brandon that will cut more than 100 miles from the route to Minneapolis is promised for next year by the Provincial authorities. The route will be via Doloresville, through the municipality of Morton, the Turtle Mountain reserve and thence to Dun, N.D., where connection will be made with one of the main trunk highways of that state.

Mothers Should Use

When The Babies Are Cutting Teeth
During the baby's teething time, in the hot summer months, the bowels become loose, the baby is restless, irritable, cramps and other bowel complaints manifest themselves; the gums become swollen and sore from the heat of the month, and in many cases the child wastes to a shadow, and very often the termination is fatal.

This is the time when the mother should use "Dr. Fowler's," and, perhaps, save the baby's life.

It has been on the market for the past 80 years; put up only by The T. Millbrae Co., Limited, Toronto, Ont.

"But your wedding was to take place tomorrow."
"Yes, but we have to leave today for our honeymoon."
"Very well, but next time you must stick to the day fixed"—Muggendorf, Blatter, Munich.

Another Martyr Of Science

British Pathologist Had Just Concluded Second Series Of Research On Yellow Fever

In the lengthening roll of heroes and martyrs who daily risk their lives for the benefit of their fellows, none hold a higher or more enduring place than the scientific investigators who devote themselves to tracing the origins of disease and devising remedies therefore. Word came only the other day reporting the death at Lagos, West Africa, of Professor Adrian Stokes, famous British pathologist, who had just concluded a second series of researches as a member of the Rockefeller Commission on Yellow Fever. Thus another of the brilliant rising figures in the field of tropical disease research has disappeared from mortal ken, succumbing, after a brief illness, to an attack of the same plague he was doing his best to exterminate.

Dr. Stokes made a distinguished record in the war, and later became assistant professor of pathology, bacteriology and preventive medicine at Dublin University. He held this post till 1922, then becoming professor of pathology at the University of London, and a member of the staff of Guy's Hospital. Seven years ago he paid his first visit to Lagos, returning there to complete his work on Yellow Fever. In his case heretofore his younger days, had crowded striking accomplishments into his brief professional career and devoted all his best willingly to the work of liberating humanity from the menace that had given West Africa undesirable notoriety as the "White Man's Grave."

Radium and the X-ray when first examined by daring experimenters brought untold suffering and death to its handlers before their dangerous properties were realized. Death literally by inches was the fate of some of the first of them, but they accepted their doom as part of the game. Now comes the gratifying intimation that the X-ray danger is now a thing of the past. The announcement came from Dr. G. W. C. Kaye, one of its leading authorities, at McGill University the other night and will be received with satisfaction by the medical profession at large. Since its discovery in 1895, over a hundred radiologists have died from undue exposure to the ray, while many more have become crippled or suffered serious impairment of their general health.

No one need endure the agony of corns with Holloway's Corn Remover at hand to remove them.

Latest Achievement Of British Salvors

Towed Ex-German Warship Upside Down For Three Miles

The towing of a 23,000-ton warship upside down for three miles is the latest achievement of British salvors. The ex-German battle-cruiser Moltke was raised nearly three months ago from the floor of Scapa Flow, in the Orkneys, by Messrs. Cox and Danks. She lay on Cava Island bottom up, and much of her outer casing was removed. But in her casing position work would be impossible during the winter gales, and it was decided to remove her to Lyness. All holes were plugged and pumping begun, and as the air-pressure increased and she became partly buoyant, a darning dock was placed on each side. Then her last voyage began to Lyness Pier.

A physician says that women seldom talk in their sleep. Of course they don't; the organ of speech must have an occasional rest.

People who borrow trouble are always anxious to turn it over to others.

"But your wedding was to take place tomorrow."
"Yes, but we have to leave today for our honeymoon."
"Very well, but next time you must stick to the day fixed"—Muggendorf, Blatter, Munich.

Will there be snow in England?

In Scotland the ponds freeze and they go skating at Christmas, but England often sees a green December. It would be a wonderful change for you to go home, and the comfortable crossing is alone a good holiday. Are you going?

The Anchor-Donaldson Steamer "Lettitia" leaves Montreal for Scotland on November 26th. The Cunarder "Austonia" leaves Montreal for the Channel Ports on November 25th.

Special Christmas sailings from Halifax for the second week in December will enable you to arrive in plenty of time for plum puddings and haggis, bagpipes and pantomimes.

Round trip from \$155.00 up, everything included. Children half fare. Your Steamship Agent will make all arrangements.

Planning Safety Airplane

New Idea Of North Carolina Man May Eliminate Hazards

Proposing the development of a monoplane with wings and fuselage carrying sufficient helium to make the craft lighter-than-air, Edward Stimsoning, a cigar maker, believes he may make flying as safe as automobiling by eliminating nose dives, tail spins and other aviation hazards. Stimsoning has designed a model of an all-metal plane with a wing spread of 30 feet and a length of 100 feet. The wings are rounded and 15 feet in width.

Motors and passenger cabin are slung below the fuselage, a feature which the inventor believes will give the craft an equilibrium by which it will right itself when swerved from its balance.

As a verniforme an effective preparation is Mother Graves' Worm Exterminator, and it can be given to the most delicate child without fear of injury to the constitution.

The Prefect of Police of Peking, China, has issued a decree forbidding short hair, short skirts and décolleté gowns.

The BABY

Why do so many, many babies of today escape all the little fretful spells and infantile ailments that used to worry mothers through the day, and keep them up at night?

If you don't know the answer, you haven't discovered pure, harmless Castoria. It is sweet to the taste, and sweet in the little stomach. And its gentle influence seems felt all through the system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, so you may give it freely, at first sign of colic or constipation, or diarrhea. Or those many times when you just don't know what is the matter. For real sickness, call the doctor, always. At other times, a few drops of Fletcher's Castoria.

The doctor often tells you to do just that; and always says Fletcher's. Other preparations may be just as pure, just as free from dangerous drugs, but why experiment? Hold the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold!

Children Cry for
Fletcher's
CASTORIA

Russia Attempts To Salvage Millions In Treasure From Sunken Ship In Balaklava Bay

From the depths of Balaklava Bay the other day there was brought to the surface a gold coin. Its date was the year 1821 and it bore the inscription of George IV. Here, many felt, was tangible evidence that the retelling of the British cruiser Black Prince, sunk in the great storm that swept over the harbor when the Crimean War was in progress, still holds fast to its treasure of a half million pounds sterling. One more clue to the quest for "drowned gold"—a quest which goes on all over the world. Sometimes lost treasure ships are not found; sometimes, if found, it proves impossible to bring up their cargoes.

It took two years of submarine search for the Soviet Government to discover the timbers of the Black Prince. Within three months from the time of commencing work the Japanese company to which the contract for salvaging had been let brought up its first coin.

The treasure galleons of Spain that sank in the Caribbean, the strongrooms of the majestic East Indian ships that perished many years ago, the precious freight of many an ill-fated liner of modern times all have their seekers. Untold millions lie in the wrecks of argosies sunk by storm or war. Syndicate after syndicate has been formed to find them and every appliance of the diver has been brought into play.

The Lusitania, victim of a German submarine, lies in 252 feet of water with \$5,000,000 in her hold; yet it is doubtful whether any attempt will be made to raise her for years to come. The working depth for divers, it is estimated, is limited to 300 feet at present, and zone of peril commences at 100 feet. Even a prize of \$5,000,000 might not be worth recovering in view of the expenditures entailed. The British Admiralty has already refused a number of offers from Germans desirous of raising the Lusitania. They were anxious to prove their contention that she carried ammunition and was therefore a vessel of war.

One of the greatest feats in the salvaging of sunken treasure was the recovery of \$25,000,000 from the Lantic, which was torpedoed in 1917 and sank in ninety feet of water off the north coast of Ireland. Dredging proved too slow, and the crushing force of dynamite was applied to the plates of the wreck. Every coin in the strongroom was recovered by divers.

More than \$250,000,000 in bullion has, it is estimated, been recovered from the wrecks of treasure ships by French and English syndicates, which sell shares in the ventures to the public. The total of unrecovered treasure however, exceeds this sum many times over. The locations of many of these fortunes have been known for years, but the treachery of the sea and the impossibility of working beyond a certain limit have prevented salvage.

Prospectors Not Exempt

Cannot Shoot Game Out Of Season If Short Of Food

The general impression that prospectors hunting about for food are entitled to shoot game at any time has been shown to be erroneous by a case recently heard at Merritt B.C. in which a Princeton man was convicted of killing a deer out of season. The man in question, pleaded that he and his partner were short of food, but the magistrate pointed out that the privilege of shooting game out of season was only accorded prospectors in unorganized territory. According to the Act, "unorganized territory" consists of that portion of the Province of British Columbia north of the 53rd parallel (which passes somewhere near Quesnel). While refusing to accept a plea of ignorance of the law the magistrate reduced the fine to the minimum of \$25.

Help Wanted

The rich bachelor sighed. He spoke: "Things are all sizes and seven with me. I feel the great need of a woman in my home—one who could straighten out my tangled affairs and make life worth living again." The girl looked at him expectantly. "Yes," she said very softly.

"Do you know of any good able-bodied woman whom I could get to manage my house?" he concluded.

More—"Do you think you kin sport my daughter?"

First—"Ah sah de."

More—"Ehah see her eat?"

First—"Ah sah de."

More—"Ehah see her eat when no one was lookin'?"

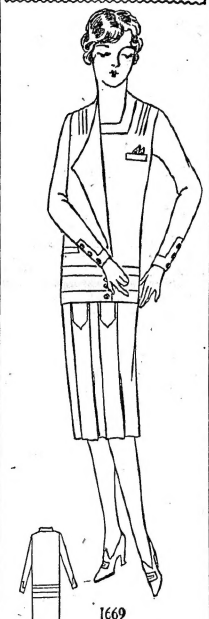

W. N. U. 1703

Interest In Aeroplane Clubs

Recent Announcement Of Department Of National Defence Brings Many Inquiries

Keen interest is being manifested throughout Canada in the proposal advanced by the Department of National Defence some days ago with respect to the formation of light aeroplane clubs in the chief centres of population, and already the department has had many inquiries from all parts of the country.

The first light aeroplane club in Canada was formed at Ottawa recently and there are indications, according to departmental officials, that within a short time further advantage will be taken of the offer made by the Government to assist such organizations. This, in brief, amounted to the Department of National Defence furnishing each club with two light aeroplanes of the De Havilland biplane type, the chief condition accompanying the offer being that such planes be maintained under expert supervision and proper care to be taken of them.

A Daytime Frook Of Smart Distinction The discriminating miss or small woman will find this an unusually smart and becoming frock. Of special interest is the revers, which may be of matching or contrasting material, and the set-in sleeves placed at the upper left and lower right side. The skirt has two box-plaits in front and is joined to the bodice, while the back is in one piece, and the long sleeves have shaped cuffs trimmed with buttons. No. 1669 is in sizes 16, 18 and 20 years. Size 38 (36 bust) requires 3 1/2 yards 39 inch, or 2 1/2 yards 54-inch material. If the revers is made of contrasting material, 1/2 yard additional 39-inch (cut crosswise) is required. Price 20 cents the pattern.

Wool Research Work

Will Study Wool Growing and Wool Manufacturing in Canada

Final practical plans for research work into wool growing and wool manufacturing in Canada, designed to help both farmers and the industry, were completed at a meeting held in Toronto of a special committee under the chairmanship of Dr. H. M. Tory, of Alberta, president.

Basic considerations and methods of examination of Canadian grown wools were outlined in a report from Prof. J. P. Sachville, University of Alberta, with special reference to wools produced in the west. A. McMillan, department of agriculture, Ottawa, impressed the meeting with the importance of the sire in raising efficient flocks.

Prof. Wade Toole, Ontario Agricultural College, was also of the opinion that the ram was the most important study, and that Shropshire rams imported from England had ruined many flocks in Canada, and other flocks had been ruined by imported rams of other breeds. He considered that Canadian farmers could and should breed their own rams instead of importing them. Mr. Tisdale, an official of the Canadian Co-operative Wool Growers' Association, upheld Mr. Toole, declaring that Oxford rams imported from England had ruined flocks in western Canada.

Spirit Of Adventure

Dominant In The Youth Of Twenty Years Ago, But Is Less Now

A lessening of the spirit of adventure, coupled with a tendency to incline support toward agencies which exist for that purpose, may be important factors in the diminution of emigration from Great Britain. This suggestion is advanced by J. Bruce Walker, director of European immigration for the Canadian department of immigration and colonization. This spirit of adventure and optimism, said Mr. Bruce Walker, in an interview at Ottawa, was dominant in the youth of twenty years ago, but, through either social or political reasons—or a combination of both—there is now, he said, too great a disposition to look to others for aid in doing what should be done by oneself.

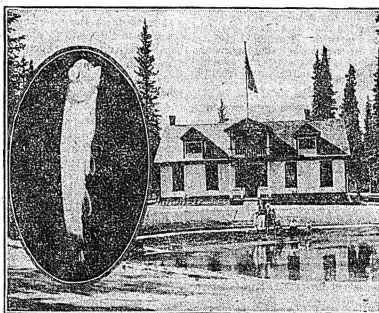

Honored Dr. Best

Dr. Charles H. Best, co-worker of Dr. F. G. Bantling in the discovery of insulin, was honored by Harvard at the opening of the new Harvard medical dormitory when the common room was officially named the Charles Herbert Best Room, in recognition of his work and as an inspiration to the students. Dr. Best attended the ceremonies which were presided over by President Lowell.

MacDonald—I duna ken why Sandy laid over on his side when he saw the steam roller about to run over him. It was vera peculiar.

MacPherson—Awed, he wanted his pants pressed for the funeral, and he was afraid the creases would be the wrong way.

A book called "The Latest Dodge" has just been published. Pedestrians should get some valuable hints from this volume.

The Banff Fish Hatchery where the albinos are raised. (Inset) The unusual trout in question.

A FISHY ALBINO STORY

This story proves the saying: "Truth is stranger than fiction," and it is the truth, the whole truth, and nothing but the truth.

As the picture shows, it is a fish story, originating in Canada's most beautiful scenic spot, Banff. Albinos appear quite frequently among animals and humans, but among the piscatorial tribes they are practically unknown. That is to say, they were unknown until this summer. Now they have them at Banff, where all visiting there may see and believe.

These albino brown trout, an even fifty of them, are located at the government fish hatchery where they had a hatch of 118,000. Out of this 55 saw the light, as you might say. Later another five died while quite young,

Electric Lights For Laying Hens

More Eggs Are Obtained During the Winter Months

In order to find out what effect electric lighting has on egg production and the general development of hens, a test has been carried on during the last three years at the Kapuskasing Experimental Station in Northern Ontario. In each of the three years one hundred pullets were used in the experiment. They were equally divided as to weight, general development and breeding into two pens of fifty each. All conditions were similar except that one pen got no electric light while the other was lighted from four in the morning until daylight from November 1 to April 30.

The results of the experiment which are given in the latest report of the superintendent of the station, show that lights have a favorable effect on the number of eggs laid during the winter months, as the three year average showed an advantage of nearly 600 eggs for the pen with lights. At the same time over the whole year the pen with lights laid fewer eggs than the one without lights. The biggest advantage in the use of lights would appear to be in the fact that more eggs are obtained during the winter months when the price is high. The experiment also showed that lights have very little effect on the body weight of laying pullets during the winter months. They also have little effect on the amount of feed consumed, and therefore on the cost of feeding.

Fifty Miles Of Books

Library Of British Museum Started On Small Scale

The British Museum Library contains nearly 4,000,000 books, stored on fifty miles of shelves.

Before the opening of the present reading room in 1875, this gigantic storehouse of literature was consulted by only some half-dozen readers daily. They were accommodated in a small basement room, furnished with a few "cane-bottomed chairs and one halze-covered table."

Readers now average between 600 and 700 daily. They sit at desks radiating like the spokes of a wheel from two concentric circles, in the inner of which sit the officials, while the printed catalogue, comprising about 1,000 volumes, is arranged round the outer circle.

Discuss National Problems

The advisory boards of farmers' institutes, representing the farmers of British Columbia, endorsed the proposals made at the recent meeting of the Canadian Chamber of Commerce in Vancouver, to create a joint council of farmers and manufacturers to discuss national problems.

Great Britain has the fastest naval craft, the fastest motor car, and is now building an aeroplane that will travel 300 miles an hour. Aren't these English slow?

Louis Mathon, age 101, is reputed to be the oldest survivor of the Crimean campaign in France or England and the last Crimean veteran.

Interesting Sidelight Is Thrown On History of the North-West And Upon Early Indian Customs

Fencing For Sheep

Department Of Agriculture Prepared To Render Assistance

One of the principal reasons given by farmers for not keeping sheep is the difficulty of fencing the stock. The Department of Agriculture at Ottawa has recognized this difficulty and through the Live Stock Branch is giving encouragement to the providing of proper fencing. One of the services of this branch of the department is the assistance it gives to the organization of sheep clubs made up of memberships of boys and girls of ten years or members of Junior Farmers' organizations. In addition to helping these clubs to procure breeding stock, including pure bred males, members are helped to procure loans for the purchase of proper sheep fencing. That is to say, any member of a club in good standing who is prepared to provide one-quarter of the cost of a new fence, is enabled by reason of his membership in the club to borrow the other three-quarters of the necessary expenditure for building the fence. To do this, however, he must satisfy the bank in his local district that the loan is justified to secure a suitable fence. Further particulars as to the assistance that the Department of Agriculture is prepared to give to sheep breeding are given in Pamphlet No. 76 of the Department of Agriculture at Ottawa, which gives specifications for a suitable sheep fence which is recommended should not be less than 42 inches high, with not less than seven line wires, 16 staves per rod, with the top and bottom wires No. 9 gauge and the intermediate wires of 12 gauge. When it is necessary that the fence shall keep back cattle and horses the pamphlet recommends that the fence must carry in addition one strand of barbed wire and preferably two. The corner posts of such fences must be properly anchored and the posts set not more than one rod apart.

How is it that in a country like Canada, where slavery has never been an institution, the word "slave" should enter into the names of prominent geographical features, such as, Great Slave Lake, Slave River, and Lesser Slave Lake?

A statement furnished by the Geographic Board of Canada, throws an interesting light on the history of the North West and upon Indian customs. Indian place-names, it points out, may refer to physical characteristics of the place, to incidents in the history of the tribe, or to associations of a tribe with a region. Examples may be seen in Saskatchewan River (swift flowing), Battle River (place of numerous battles), and Ottawa River (river frequented by the Ottawa tribe). Another point is that Indian tribes generally had two names—the name they gave themselves, and the name given them by their enemies—and in many cases the names which have been used by the white man have been "enemy" names. This accounts for the very uncomplimentary names which some Indian tribes bear.

The record then proceeds to the effect that Great and Lesser Slave Lakes and Slave River were named from a tribe of Indians which once dwelt in this region. These Indians called themselves Etchewatines, which means "the people dwelling in the shelter of the (Rocky) Mountains." In contradistinction to other northern Indians who were caribou hunters and travelled widely in pursuit of game, the Etchewatines were fish-eaters and kept to the lakes.

When the more warlike Crees went on the war-path against the tribes on the Peace River they came from the south in canoes to Lesser Slave Lake, and leaving their canoes there, proceeded overland. It is, therefore, readily to be understood how war parties of Crees, finding that the lake-dwelling Indians did not possess their own warlike attributes and ideas, show their contempt by bestowing on the lake-dwellers the epithet "awank" or "slaves."

To Repair British Houses Of Parliament

Work Will Occupy Fifteen Years and Cost Six Million Dollars

It is estimated that the cost of repairing the Houses of Parliament which is to begin the next few months, will amount to almost \$6,000,000, and that the work will occupy fifteen years. The figure is more than half the original cost of the buildings, and they took less time to build than Sir Charles Barry's plans than will now be spent in repairing them.

There is no question that the Houses are among the great buildings of the world, architecturally as well as in mere size, though Englishmen do not always recognize their worth. To go over them above and below ground, and from end to end, is a good day's work.

There are something like 1,500 fireplaces in the two Houses, and the points of light run to very high figures, necessitating a large caretaking staff always on the spot. It is mainly the exterior however, with which the public are concerned.

Unconscious Pest Carriers

Plant Destroying Insects Carried Long Distance By Motorists

A new agency in the spreading of plant destroying insect pests over the country is the automobile tourist.

The New York state department of forestry in its war on the destructive gypsy moth has discovered that light fiber-like deposits from which the moths are born are easily borne long distances in the baggage of innocent tourists who have been camping in infested areas.

Although the gypsy moth's destruction so far has been confined to New England, evidence that it has crossed the Hudson has been discovered recently, and motorists returning to the middle west are being urged to cooperate with the authorities in the campaign to check its inroads.

A man just returned from the Arctic Regions said that the North Pole would have been reached if the dogs had not given out. "But I thought those dogs were tireless," exclaimed an old lady.

"I was speaking," the explorer replied, "in a culinary sense."

Wealthy Parent: "What are your prospects if you marry my daughter?" Poor Sutor: "Excellent, if I marry your daughter, sir."

Being born great carries no assurance with it that a man will be great at the finish.

An Excuse For Existence

Horse Pays Best On Short Hauls and Frequent Stops

In spite of the omnipresence of the automobile, the horse still has an economic excuse for existence. However there are "short hauls" and frequent stops, it pays to use horseflesh instead of gasoline. It costs 6 cents a minute to keep a big auto truck on the streets of New York, and only two cents a minute to use a two-horse team that will draw nearly the same weight of freight. The milk companies of the same city have found that it costs \$102,000 less a year to deliver 1,000,000 worth of milk in one-horse wagons than by automobile trucks. And with the continually increasing congestion of motor traffic Dobbin's economic advantage promises to increase rather than diminish.—Youth's Companion.

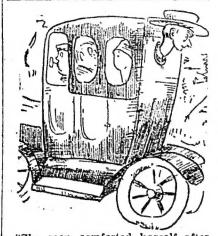

Health Education

Social Hygiene Movement Is Deserving Of Loyal Support

"The thing most needed in any nation is to secure the health of its people, for health means happiness, contentment, progress, and prosperity. In order to secure a healthy nation we must see to it that health education becomes general, particularly in regard to preventable or necessary illness."

"Social Hygiene is a movement for better health—mental, moral, physical and social—and as such well merits the loyal support and encouragement of every true Canadian citizen."—Sir Arthur Meighen, C.M.G., Principal of McGill University, Montreal.

Young doctors in England now face capital to buy themselves practices through a new insurance plan.

"She soon comforted herself after her first husband."

"Yes, but her second husband didn't!" — Sandaglesse-Sirix, Stockholm.

Empire Christmas Pudding

Empire Marketing Board Sends Out a Recipe by the King's Chef.
The King's Chef, M. Cédard, with Their Majesties' gracious consent, has supplied to the Empire Marketing Board a recipe for an Empire Christmas Pudding. The following are the ingredients, together with the portion of the Empire from which they are obtained:

Five pounds currants, Australia; 5 lbs. sultanas, Australia; 5 lbs. stoned raisins, South Africa; 1½ lbs. mixed apples, Canada; 5 lbs. bread crumbs, United Kingdom; 5 lbs. best suet, New Zealand; 2 lbs. cut candied peel, South Africa; 2½ lbs. flour, United Kingdom; 2½ lbs. demerara sugar, West Indies; 20 eggs, Irish Free State; 2 ozs. ground cinnamon, Ceylon; 1½ ozs. ground cloves, Zanzibar; 1½ ozs. ground nutmegs, Straits Settlements; 1 teaspoonful pudding spice, India; 1 gill brandy, Cyprus; 2 gills rum, Jamaica; 2 quarts old beer, England.

Icelander's Remarkable Feat

Swam Twelve Miles in Arctic Ocean With Temperature at 33 Degrees

Swimming the English channel is never a piece of cake for a young Iceman, Erlingur Pálsson, a constable of Reykjavik, who swam twelve miles in the Arctic Ocean with water at a temperature of 32.5—barely above freezing point. He wore three bathing suits.

It is 900 years since this swim from the island of Dyngve, in the Skagaford, to the mainland has been accomplished, and that was by the legendary outlaw, Greittir. Until Pálsson swam the distance nobody had dared the legend, for it was regarded as impossible for a human being to endure the freezing water for the four and a half hours necessary to cover the twelve miles.

Value Of Newspaper Advertising

Says Advertising Is Right Hand Of Business of Today

Merchant, advertiser and publisher, the modern triangle of business, united in general discussion of problems at the semi-annual meeting of the Canadian Association of Advertising Agencies held in Montreal.

Joe Laporte, vice-president and general manager of Laporte, Martin Ltd., in telling what the merchant thought of advertising, said advertising was the right hand of business and that "today a business has no right to be without its advertising agencies for the leading part they have taken in the development of newspaper advertising."

When your tea doesn't taste right the chances are that it is put up in an inferior package. To be sure of getting tea of unvarying good quality, see that the package is rust, dust and damp-proof. In other words, make sure it is Red Rose Tea in the bright, clean, sanitary aluminum package—the finest container ever used for tea.

An Annual Event

Here is a story a Hiawatha, Kansas, young lady told on herself. It is the honest truth. She is still wearing a dress she wore when she was 12 years old. The material is so good that she doesn't want to throw the dress away, has no younger sister to give it to. Each year she says, in order to keep pace with the march of fashion, she takes up the dress at the hem. So it annually gets shorter.

DEBILITY DUE TO INDIGESTION

Perfect Digestion Comes Through Rich, Red Blood

There can be no perfect digestion unless you have rich, red blood. This is a scientific truth. It is also true that there is no tonic for the stomach that is not at once for every other part of the body. The way, then, to tone up the stomach is to tone up the blood.

The many so-called stomach remedies merely try to digest your food for you. How much better it is to tone up the stomach so that it will do its own work as nature intended. There is no pleasure in eating poorly digested food. Tone up your stomach and your appetite and digestion will soon be normal.

If your digestion is weak and your blood thin you need the help of Dr. Williams' Pink Pills for Pale People. This is a gasoline salesman when I was taken sick. I felt very miserable and lost twelve pounds in weight. I did not sleep well and could not eat and could scarcely retain anything in my stomach. I went to a local doctor who told me the funner of the gas had got into my system. He gave me some medicine and told me I had better go to the country for a change of air. I did so, but I still felt listless and groggy, and had no ambition. On the advice of a friend I decided to try Dr. Williams' Pink Pills. I had not been taking the pills long before I was beginning to rest better, and to eat fairly well, and to get out anything. I have since had splendid health and cannot say too much in praise of Dr. Williams' Pink Pills.

You can get these Pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Remains Of Ancient Villages

Kitchens Of Prehistoric Villagers Uncertainly In Vicinity Of Prince Rupert

The Dominion Archaeologist of the National Museum, Ottawa, has just completed the examination of an ancient village site at Emerson Point, Igloo Island, about three miles from Prince Rupert, which was reported to him by Mr. R. W. Pillsbury, of the Prince Rupert Fisheries Station of the Canadian Biological Board. The site is about one mile from the Canadian National Railway across the channel. It covers the entire point fronting on both beaches and is about 215 feet long by 155 feet wide. It consists of deep deposits of the shells of edible shellfish and refuse from the kitchens of the prehistoric villagers. This refuse lies in two terraces and seems to indicate that there were two rows of houses facing the north beach, each house being about 45 feet square. Three rows of houses on the east beach—two houses on one terrace and one on a lower level. Creeks bound the village site on both the west and south. They evidently furnished fresh water—while the beaches afforded shellfish. There appears to be the remains of a fort wall protecting the village on the point from approach by land. Several specimens of ancient handiwork were collected on this site. One is a hammer or pestle or mallet, made of a piece of bone, the ends of which are flattened and grinded faces. Another secured for the National Museum, is of particular interest. It is a fragment—about 10 centimetres long and 2 centimetres wide—of a piece of bone which has been used for hollowing out canoes from cedar trunks, smoothing boards split from the large cedars for building houses and for similar purposes. It has been sent to Ottawa for examination by expert archaeologists as it may be a relic. It certainly is a beautiful relic, green in color and so hard that it cannot be scratched with a knife. No such stone is known in the vicinity. There are a number of these interesting ancient places within five miles of Prince Rupert according to the archaeologist of the National Museum who says they may all be reached by motor boat from the wharf. There are deep kitchen middens marking ancient and prehistoric villages. One at Casey Point, opposite Emerson Point, is cut by the C.N.R.; a second also cut by the railway is at Fairview Observation Point; a third, smaller perhaps than the others, is on the north side of the mouth of Hays Creek near the dry dock in Prince Rupert; still another like this, cut by the C.N.R., but much larger and more than five feet deep, is near the cold storage plant on Ritchie Point within the city limits of Prince Rupert. There are several other such shellfish pits on Igloo Island and the mainland to the north—some at the hospital on Dodge Island, one along the west and southwest shore of Elizabeth Point, one at the Marine Station. A very large one is located on Robertson Point and on the rocks of the western part of this point is a nearly horizontal petroglyph or rock painting in the shape of a human figure nearly natural size. The Indians say it is where a man fell from heaven and landed the rock. Other petroglyphs occur on the western side of the cave in the south side of Wilegah Island near the high tide line. The Dominion Archaeologist recently found the huge deposit of an ancient village cut by the path on the western end of Igloo Island, August 11, 1927. There are numerous other remains near Prince Rupert, all of great interest to some tourists and a few local people. No real exploration or extensive excavation of any of the ancient remains in the Tsimshian linguistic area has ever been attempted. Here is the key to many of the problems of the anthropology of Western Canada and in fact of North America.

When an impassioned orator held out his arms and wailed pathetically: "Have any of you ever known hunger?" a girl in one of the front rows nearly broke up the lecture by audibly remarking: "I'll tell the world; I was ten minutes late for lunch today."

GIRL AVIATOR IS RESCUED BY A PASSING VESSEL

Paris.—Ruth Elder failed by a scant 800 miles of accomplishing the feat of being the first woman to cross the Atlantic by aeroplane.

She and her co-pilot, Captain George Haldean, were forced down on the waters of the Atlantic by a broken oil pipe and were taken aboard the Dutch tanker *Barndrecht*, which rescued them.

The "plane" was estimated to have travelled 5,000 miles along its 2,500-mile journey.

The "plane" was destroyed by fire as the ship was attempting to salvage it, the ship reported. The *Barndrecht* was en route to the Azores.

The first news of the landing and rescue arrived here in a radio message Miss Elder sent to the Paris office of the Associated Press.

Ankton, Ala.—"We are safe and no one any worse off," Ruth Elder informed her mother, Mrs. J. O. Elder.

The message, sent from the tanker *Barndrecht*, which picked up Miss Elder and her co-pilot, George Haldean, and relayed by the steamer *Bayano*, reads:

"We are safe and no one any worse off. Landed by S.S. *Barndrecht*. Wire you plans later. Love, Ruth."

Employees Can Buy Shares

Sir Alfred Mond To Try Out Co-Operation Plan

London.—Co-operation between employers and employees, which is not a new matter in the United States, is about to be tried out here by Sir Alfred Mond with 40,000 employees in his big Imperial Chemical Industries.

Sir Alfred's idea is to make a capitalist of every one of his factory hands.

Through his offer the employees can buy Imperial Chemical shares, quoted at 20 shillings, for 27 shillings, six pence. The only restriction is that they do not speculate. He will award free shares to workers on the basis of a man earning \$1,000 annually or less getting a free share for every four purchased. The workers can vote on their stock.

"That will create a direct bond between the company officials and workers," Sir Alfred said. "Industrial peace will not be gained by pleasant talk and nice dinner parties, but by actual contact between the men and employers working out practical schemes."

Irish Free State

President Cosgrave Makes Few Changes in His Cabinet

Dublin.—President Cosgrave, re-elected as chief executive of the Irish Free State created in the Dail Eireann, has made few changes in his ministry.

The changes that were made give Hon. Ernest Blythe the postmaster's seal as well as the portfolio of immigration. Hon. Patrick McGuigan took over the interior affairs ministry in addition to his Ministry of Commerce, while Hon. James Fitzgerald Kenney, became Minister of Justice.

After a four-hour debate on the whole Government policy the Dail approved by a vote of 76 to 70, President Cosgrave's cabinet.

May Injure Empire Trade

Change in Australian Tariff Is Viewed With Concern

Auckland, N.Z.—A detriment to the paper trade of Canada as well as to Britain is predicted in the new Australian tariff which removed the duty on a large class of printing and writing papers in sheets, thus bringing Canadian and Empire imports into line with the foreign.

Formerly the foreign products paid a 20 per cent. ad valorem duty, and in some quarters of the trade the change is viewed with concern as it is felt that a severe blow will be struck at Empire trade. One trader estimates that at least half the trade will go to foreign countries. Another merchant says that several firms have cancelled orders for Empire products and are awaiting event.

New Rural Mail Routes

Regina.—The necessary authority has been given by the post office department for the establishment of ten additional rural mail routes in the Saskatchewan postal division, according to John Charnard, district superintendent of postal services.

One of the new routes which will be known as Saskatoon R.R. No. 5, will go from Saskatoon to Floral.

Says Baffin Land Habitable For Whites

But Is Not Desirable Place Dr. Livingston Finds

Ottawa.—Baffin Island, although not as pleasant a place of residence for white men as more Southern latitudes, is nevertheless capable of sustaining a vigorous and contented native population. This is an essential point in the report of Dr. L. D. Livingstone who has just returned from 15 months duty as medical officer in the Canadian Arctic Archipelago. Dr. Livingstone who was a member of the staff of each annual expedition to the Canadian Arctic, from 1922 to 1926, examining the natives at the different ports of call, remained in the North at the conclusion of the 1926 patrol and spent the winter of 1926-27, and the spring and summer of this year, in a detailed inspection of the natives in the interior whom it had not been possible to see on his previous annual visit.

The need of educating the Eskimos in wild life protection, in the practice of economy, and in methods of hygiene is strongly urged by Dr. Livingstone. The habit of putting aside supplies of food and other necessities for seasons of scarcity and a knowledge of sanitation would greatly improve general conditions among the Eskimos of the Eastern Arctic.

Plans For Willingdon's Visit To Washington

Program Being Worked Out By Canadian Legation and State Department

Washington.—The tentative program of entertainment of Lord Willingdon and Lady Willingdon at Washington, December 18, is now being worked out by the Canadian Legation and state department. It will be the first visit a Canadian Governor-General has made to Washington since that of the Duke of Connaught in war years, and the first time Canada's titular head has been entertained in Washington on Canadian territory.

His Excellency will exchange visits with President Coolidge and members of the cabinet and will be given the usual recognition of a representative of royalty.

It is understood that the visit has no special purpose except to establish of personal contact between the governor-general and heads of the U.S. government.

On previous occasions the Canadian Governor-General has been entertained at the British embassy. The difference on this occasion will be that he will be able to entertain officially at the Canadian Legation as the representative of Crown in Canada.

Invited To Deliver Address At Washington

Premier King To Take Part In Dedication Of Memorial

Ottawa.—It is reported here that Premier King has been invited and will deliver an address at the dedication of a memorial in Arlington Cemetery, Washington, to the Canadians who fought in the American Expeditionary Force during the Great War and gave their lives for the common cause.

It has been suggested, and the suggestion is being considered, that the prime minister be escorted by a contingent of Canadian troops at the ceremonies which will take place October 29.

Winter Fair Dates

First Saskatchewan Show Will Be Held November 1

Regina.—Dates for the different sections of the Provincial Winter Fair were approved at a meeting of the board of directors of the Regina Exhibition Association, held under the chairmanship of President H. G. Smith.

The sheep and swine show, it was decided, will be held on November 1, 2 and 3; the dressed poultry show on December 7; live poultry exhibition, January 17, 18 and 19; and horse and cattle show, March 27-29.

An Important Agenda

Ottawa.—The premiers of the provinces of Canada will face an imposing agenda of nearly fifty items when they meet here on Nov. 2. The conference of the premiers promises to be the most important of its kind since Confederation, in view of the fact that several constitutional questions will come up for discussion and perhaps action. While the conference will have no actual legislative or administrative authority, its conclusion will be far-reaching, as they will affect the legislative programmes of the future of the nine provincial governments during the next year.

Premier Offers Congratulations

Sends Wire To Hon. R. B. Bennett On His Appointment To Leadership

Ottawa.—Among the first to telegraph congratulations to Hon. R. B. Bennett, K.C., who was selected by the national convention to be leader of the Conservative Party, was the Right Hon. W. L. Mackenzie King, Prime Minister of Canada, and leader of the Liberal Government. The Prime Minister despatched the following wire to Mr. Bennett:

"I have just learned of your selection as leader of the Conservative Party of Canada, and desire to tender to you very hearty congratulations upon the confidence thus expressed in you by the members of your party, and on the distinguished honor which they have conferred upon you."

The telegram bears the Prime Minister's signature.

MOVE TO SPEED UP IMMIGRATION FROM BRITAIN

Winnipeg.—Adoption of a quota policy in Canada to restrict continental immigration was not regarded as feasible, Hon. Robert Forke, Minister of Immigration and Colonization, told a delegation of the general synod of the Anglican Church, which conferred with him here, but he gave his assurance that his department would do all it could to promote British immigration and to keep control over continental immigration.

The delegation consisted of Archbishop Matheson, the primate of all Canada; Chancellor Macbray, Mr. Justice Donaldson, J. W. E. Armstrong, W. G. Styles, Regina; G. H. Woods, Loftus H. Reid, Toronto; and Canon Vernon.

A statement issued said: "Mr. Forke stated that the subject of immigration would occupy an important place on the agenda of the conference between the Dominion and provincial governments in November."

"The minister expressed a desire to meet representatives of the churches and other voluntary organizations interested in immigration to confer with him at Ottawa with a view to furthering in securing an increased flow of British settlers for Canada. The minister pointed out the valuable assistance that can be rendered by the churches in developing non-landed, farm workers and household workers, to receive the assisted passage rate. He mentioned that in the past year more than 5,000 Britishers have been thus nominated."

"Mr. Forke told the delegation that the assistance to be offered to enable British boys to make good in Canada as farm workers to take up land of their own will be applicable to boys placed out through the church of England hostels at Winnipeg, McElliott and Edmonton. The department was doing everything possible to develop family settlement schemes along somewhat similar lines to the existing 3,000-family scheme."

"The Archbishop assured Mr. Forke that there had not been on the part of the synod or the church any intention of attacking or embarrassing the Government, nor were they accused by any ill-will towards the Roman Catholic Church."

Receives Diploma

Miss Dorothy Moore, daughter of Rev. T. Albert Moore, D.D., and Mrs. Moore, 181 Godfrey street, Toronto, has been awarded the diploma of the Royal Life Saving Society of London, England. She is physical director of the Calgary Y.W.C.A., and is the first to bring this coveted award to that city.

Trying To Reach Coast

Mexican Rebel Leaders Being Pursued By Feder. I Troops

Mexico City.—Pursued through the wild mountain country of western Vera Cruz, the rebel generals, Amelio Gomez and Hector Almaraz, were believed to be attempting to reach the coast, where passage in a fishing boat or other small craft would put them beyond the reach of the government.

Not on their trails are scouting parties of federal troops under command of General Gonzales Escobar, who reported that he had inspired the rebel forces and captured the main body, leaving Gomez and Almaraz with only about 100 followers.

To guard against the activities of bandits attempting to take advantage of the situation, the government has ordered an adequate escort of federal soldiers for every freight and passenger train.

Japanese Volcano Erupted

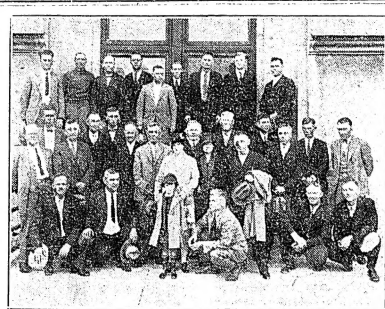

Covered Countryside For Seventy Miles With White Ash

Tokio.—With a thunderous roar, Asama-Yama, active Japanese volcano, erupted recently, emitting an immense volume of thick black smoke and covering the countryside with a white ash.

Farmers at work in the fields were compelled to use umbrellas as a protection from the ashes which fell as far distant from the volcano as Ito-nohama, seventy miles to the east. (Asama-Yama is about 80 miles northwest of Tokio.)

Infantile Paralysis Serum

Indianapolis, Ind.—Commercial production of a specific, said to be beneficial in the treatment of infantile paralysis, was announced here by the 123 Lilly Biological laboratories, the concern which first produced insulin as a commercial product. The new serum has been developed in co-operation with Dr. Edward S. Rogers, head of the division of experimental bacteriology of the Mayo foundation, Rochester, Minn.

SEEKING LAND IN CANADA

This photograph, taken outside the Union Station, Winnipeg, is of a group of prominent United States farmers, who have been looking over settlement prospects in Saskatchewan and some of whom have purchased land. They were brought to Canada in September by Capt. L. B. Boyd, superintendent of the land, colonization and development department of the Canadian National Railways at St. Paul, Minnesota, and were interested in the Elgin, Tynor Valley and Sulphur Lake districts, on the Canadian National Railways. Their excursion resulted in the purchase of 16 quarter sections valued at \$56,250, and a number of other deals are pending. These farmers belong to the States of Nebraska and Kansas and are all well established and possessed of considerable capital. Some of them have relatives and friends already settled in the Tynor Valley district and have been urged by them to come to Canada. Others not moving themselves, are taking land for their sons.

Arrange Exhibits For Agricultural Jubilee

Every Branch Of Federal Department To Be Represented Says Motherwell

Ottawa.—Every branch of the Federal Department of Agriculture will be represented in the celebration of Canada's Agricultural Jubilee, Hon. W. R. Motherwell, Minister of Agriculture, announced, "and they are altogether aside from the provincial, educational and livestock displays which will be part and parcel of this presentation, of the greatest of all of the Dominion's basic industries."

Alberta, which has had its banner crop year, has notified the minister that its exhibit will comprise grains from this year's yield, and that its display will be most comprehensive. Manitoba and Saskatchewan also will be represented.

The agricultural jubilee will be staged at the Royal Agricultural Winter Fair in Toronto from November 16 to 26.

Armistice Day

Occasion To Be Marked By A Two Minutes' Silence On Friday

Ottawa.—The following announcement was issued by the Prime Minister here with respect to Armistice Day observance:

"In accordance with arrangements for the observance of Armistice Day, sanctioned by His Majesty the King, the people of Canada are invited to mark the occasion by a two minutes' silence at 11 o'clock on Friday morning, the 11th of November, 1927. This is a special observance suggested by His Majesty and is in addition to the regular celebration of the date recognized by the Canadian Parliament for the Monday previous."

Needs Full Autonomy

Canada's Highest Destiny Rests With British Commonwealth Says Borden

Winnipeg.—"I yield to no man in my assertion of the fullest autonomy for this great country as a nation within the British Commonwealth of nations," declared Sir Robert Borden, former Prime Minister of Canada, in addressing the Canadian Club here.

The highest destiny of this great Dominion, Sir Robert said, rests with the British Commonwealth.

The former Premier dealt with the influence of the early French settlement in Canada on the development of the Dominion as an integral part of the British Empire.

U. S. HISTORY BOOKS HELD TO BE PRO-BRITISH

Chicago.—Violently pro-British history books have been used by Chicago school children ever since William McAndrew became principal. John Gorman, former Congressman, told the board of education which is trying the suspended superintendent on charges of insubordination.

Mr. Gorman, who investigated the history book situation for Mayor William Hale Thompson, who made a campaign pledge to oust Mr. McAndrew, particularly criticized the use in the schools of two history books written by David Muzzey.

The entire point of view, he said, was pro-British in these books and he charged there were numerous distortions, and that many vital matters pertaining to the revolutionary war were omitted. Mr. Gorman objected to many quotations, among them the following:

"The Boston tea party was the last straw."

"The colonies added insult to injury."

"The capital of Massachusetts was the seat of vulgar ostentation."

"George Washington was a tyrant, dictator, despot and the stepfather of his country."

"The Continental Congress was a collection of self-glorious laymen and mechanics."

Mr. Gorman said he found only one history that was satisfactory, this being "The History of America" by Fish.

"Most of the books," he told the board, "not only admitted but also distorted and minimized the facts which held important in American history."

In each of them was a clearly defined tendency to endeavor to unite Great Britain and the United States. Mr. Gorman told the board. They showed definite seeds of the Rhodes scholarships, the Carnegie foundation and the English-speaking Union.

BENNETT CHOSEN NEW LEADER OF CONSERVATIVES

Hon. R. B. Bennett, K.C., Calgary, is the new leader of the Conservative Party in Canada.

On the second ballot, the national convention of the party, accorded him two more votes than the necessary one-half of all votes cast.

Mr. Bennett, speaking with much emotion, acknowledged the election of his leadership.

"It was difficult, Mr. Bennett said, for him to find words with which to express his sentiments."

"I thank you for your more than generous support, which was wholly unmerited," he said.

Mr. Bennett recalled that men occasionally attended some great religious edifices for the purpose of re-nouncing many things and in order to be consecrated to a life of service. The feeling might be different about a meeting of this nature but Mr. Bennett felt that the delegates had endeavored to set him aside for a life of service to Canada.

Mr. Bennett declared he could think of no more appropriate reply than to quote from the Scripture: "Whosoever among you will be chief among you shall be servant of all."

"You have made me your leader for the time and please God that I may be your faithful servant," Mr. Bennett added, while cheers drowned the last of his remarks. He pleaded for the whole-hearted co-operation of the rank and file in discharging their duties and responsibilities as citizens of a great Dominion.

"If each of you must see to it that an efficient democracy governs the destinies of Canada, if you have all become firm believers in Conservative policies, the party will act as an instrument for good in the development of our country and in the advancement of our national life."

Mr. Bennett stated that his election to the leadership involved his renunciation of many things he had held most dear in the past.

"These things I must now put behind me, for no man may serve two masters," Mr. Bennett said. "You have told me to dedicate what talents and qualifications I may have to the interests of the party which I will now be privileged to lead."

It was true, Mr. Bennett continued, that he was a man of considerable wealth, wealth accumulated through capitalized opportunities on the great Western plains. No man, he said, could serve satisfactorily with pecuniary obligations hovering over his head. In this respect, he said, he could serve his country without fear.

Canada's future, the new leader declared, must be one of unlimited expansion and increased prestige among the nations of the world. There was a great opportunity for the Conservative Party to act as an instrument in bringing the right policies into being for the country. He emphasized the need of organizing the younger generation to which the present leaders could safely look to carry on the work of the party.

If effect were given to the Conservative policies sufficient industrial expansion would result to provide all our sons and daughters with employment within the borders of the Dominion.

"There must be no sacrifice of convictions; there must be no compromise of principles. Promise that you will be unswerving for your own party and your efforts will be crowned with success. You will then have a Government that will reflect your aspirations, your ideals and hopes, in power in Ottawa," he said.

Says West Is Optimistic

Postmaster-General Has Just Completed Postal Inspection Tour

Ottawa.—Hon. P. J. Veniot, postmaster-general, has returned to Ottawa after a postal inspection tour of Western Canada during the last three weeks. The inspected postal services in Vancouver, Victoria, Edmonton, Winnipeg, Regina and other prairie province cities.

Mr. Veniot expressed himself as highly delighted with the general trend of feeling in the Western provinces. The situation from a business standpoint, was very good, and there was a general feeling of optimism pervading the country. He had even great possibilities for a marked development of the West within the near future. The people seemed greatly encouraged by the prosperous times which had settled over the country.

The longest ocean wave ever measured was 675 feet.

How Much We Pay

Enormous Expense Incurred In Connection With Preventable Illness and Death

Four business men were having lunch together and discussing the work being carried on by a very efficient local hospital. They agreed that it undoubtedly deserved public support.

But one of the quartet unexpectedly introduced a new angle into the conversation.

"Interested as I am in the upkeep and operation of our hospitals," he said, "I would be much more interested in keeping them empty."

He showed them an economic side of the situation that they had never before grasped, in that thirty per cent. of all deaths and fifty per cent. of all illnesses are preventable. Each one suddenly realized that he personally was spending a large sum of money annually which might be saved. His business concern was spending a much greater amount. The community in which he lived was paying tremendous bills unnecessarily. Each Province, and the Federal Government as well, was shouldering an enormous additional burden in order to look after preventable illness and death.

To cope with illness, preventable and impossible to prevent, Canadians have made a capital investment of \$175,500,000 which is sub-divided as follows:

Hospitals	\$120,000,000
Asylums	50,000,000
Sanatoria	5,500,000

This capital investment is being steadily increased. Yet, it is at least safe to assume that, generally speaking, since fifty per cent. of our illness is not necessary, forty per cent. of these costly facilities are employed in dealing with preventable illness.

The yearly overhead is also staggering. Canadians pay fifty millions annually to operate these institutions. It is safe to assume that forty per cent. is used in treating unnecessary disease.

Business and industry are forced to foot a terrible bill. The number of days of labor lost yearly because of unnecessary illness is not at 16,500,000, and if \$2.50 is fixed as the average value of each day's work to the employee, there is another annual item of loss amounting to \$31,500,000.

In addition, the economic loss to the Dominion through dislocation of business and industry, through loss of production, the cost of such items as private expenditure for medical care, medicines and hospital services, caused originally by preventable illness, amounts to more than \$100,000,000 per year.

In the registration area of the Dominion during 1924, there were 66,197 deaths. The registration area covers 75 per cent. of our population. At that rate, there were 83,264 deaths across the whole Dominion in that year. Of this total, 26,479 deaths, approximately, were of preventable character.

Actually considered this resulted in a capital loss to Canada in 1924 of \$264,790,000.

The three business men first mentioned, when suddenly confronted with these statistics, were appalled. And naturally so. Leaving aside all humanitarian and charitable notions, they could visualize the way it was affecting their own affairs. They were losing a great deal of money. What, they wanted to know, was being done about it?

"I've thought about it," said the first man, "and I can see that, while it is quite true that governments and municipalities should act, the main difficulty is an uninterested public."

"Some organization will have to undertake a good deal of educational work. Our people do not neglect things of this kind because of callousness or indifference, but because of ignorance of conditions as they are. At present far too little emphasis is placed on the principle of prevention."

"You're right," put in one of the three, "and I for one am ready to go behind a movement for public education."

Newspaper Advertising

B. W. R. 177, Chicago's department store president, in a recent address before the convention of the National Electric Light Association, stated: "Without appearing to hold a brief for the newspapers we are of the opinion that, dollar for dollar, our return from newspaper advertising is much greater than from any other form of advertising." Another hasn't come to judgment—Winning Tribune.

The British telegraph service never has paid expenses since it was taken over by the post office 50 years ago.

It's often better to go straight ahead slowly than to travel in a circle at a rapid pace.

W. N. U. 1702

Raw Material For Face Powders

Only 57 varieties of Pickles, But 1,675 Of Toilet Powders

When it is considered that Americans each year spend over 20 million dollars each year on talcum and face powders, and when one prominent New York department store alone reports as having in stock 1,675 varieties of toilet powders, the possibilities of a market for raw materials suitable for use in this industry are at once apparent.

Canadian minerals which might be used in the manufacture of face powder, according to a recent publication by the Resources Service are talc, infusorial earth and kaolin.

Talcum powder is a refined quality of the hydrated silicate of magnesium known as talc. The finest quality is pure white and a special product of Italy, which in 1923 exported 17,000 tons, of which the United States took 5,550. Whether the talc, which Canadian provinces in large amounts for use in the paper, paint, and other industries and also exports, is of the exact quality required for cosmetics is a subject for inquiry. The United States, though itself the largest producer of talc in bulk, yet imports Italian talc for toilet preparations and has a good market in Britain and elsewhere for the final product. The largest supply in Canada is from Madoc, Ontario but talc is found in other provinces, and a fine quality found to a 200-mesh and used as an ingredient of soap is produced on Vancouver Island, British Columbia.

Kieselguhr, otherwise known as infusorial earth, or diatomite, because it consists of the remains of diatoms, is a silica met in commerce as a greyish-white powder. In the toilet industry it is used as a base for colored dental enamel and powders, being adherent and light, is useful in face powders up to ten per cent. Nova Scotia is at present the only active producer, but deposits, which occur as a sediment in certain ponds or shallow lakes, are found in other provinces.

Kaolin, a Canadian product from St. Jean, Quebec, is the aluminum silicate known as China clay. An electrically purified form of this named "Omose Kaolin" is well adapted for use as face powder and as a substitute for prepared chalk in tooth pastes.

Loneliness Of The Atlantic

Noted In Long Of Airship Which Crossed Twice In 1919

Imagine yourself able to gaze over an area of 19,200 square miles, stare at this writer, and yet unable to see anything but water. This should give you some idea of the vastness and loneliness of the Atlantic as viewed from the air.

It was in the log of the airship R-34, which crossed from England to America and back again in 1919, that this loneliness is most clearly set forth by E. M. Maitland. He wrote: "We are on the 5,000 ft. level. Visibility is at its maximum, and at this height, according to the text-books, we should be able to see a distance of eighty miles from the right forward to right aft; yet, although this area of visibility works out at 19,200 square miles, not a ship is in sight."

Dangerous To Fool With

Modern Devices Cause More Casualties Than Most War Have

Automobiles have brought death to 7,000 people in this country during the last twelve months, which is an increase of 400 over the preceding twelve months.

Celebrating last Fourth of July resulted in 196 deaths and 3,179 injuries.

This is a larger casualty list than America suffered in most great battles of the Revolution.

Gampower, combustion engines, high tensioned cables, airplanes and other modern devices are dangerous to fool with, except when operated by experts in a systematic way.

Alberta Silver Foxes

Three thousand registered silver foxes were inhabiting the 76 fox ranches of Alberta at the end of 1926, and it is estimated by an official of the Fox Breeders' Association that this number has been doubled this year. Gross profits from fox pelts in Alberta this year will total about \$800,000.

First Camper—"Jones is the most patient man I ever saw."

Second Camper—"Isn't he though? Last night to tried for three hours to light a camp fire by moonlight with a burning glass."

Henry—"My wife doesn't know where I was last night."

Rod—"Well, do you?"

Americans are now driving 25,000,000 automobiles, buses and trucks.

Novelty Worn Off But Interest Remains

Radio Has Become Part and Parcel Of Routine Of Life

Although radio has already won an established place in the world's special economy, it is only an infant when its present position is placed beside its immense possibilities. Yet it is an adult industry when the stability it has attained is considered. If the sense of novelty and wonder roused by its first emergence has worn off, its hold remains because radio has become part and parcel of the routine of life. Gradually, too, a better conception of its potential place is coming into evidence. People are far less content with just hearing anything and are refusing to listen unless what is pulsing through the illimitable ether is worth-while. As a consequence, broadcasting programs are improving and interest is being stimulated and sustained by continuous wide hook-ups on occasions of great moment or large popular interest. Commercially less than six years old, the radio industry in the United States claims for the trade years just closed a national market of nearly half-a-billion dollars to leave that mark far behind.

Confidence In The League

Sensible Progress In Disarmament Predicted By Sir Austen Chamberlain

"Sensible progress" on disarmament was predicted for the near future by Sir Austen Chamberlain, British foreign minister, in an interview in Paris, reviewing the recent assembly of the league of nations. "The session was interesting and had happy results," he said. The league is not yet and will not be for a long time everything its founders would have desired.

"But the world today has more confidence in the league and the league has more confidence in itself."

"I think the decisions of the last assembly permit the hope that in the near future sensible progress can be made in disarmament and international security—though the international situation at the present is not ripe for sensational developments."

Chinese Metaphors

In the Orient a poetic quality often attaches to commonplace objects. Thus it is said that in China the mushroom is referred to as "a fairy umbrella"; oranges are "golden balls"; a burglar is romantically known as the gentleman of the beam." For our expression "hush money," the Chinese equivalent is, it seems, "to scatter sleep."

Wintering Bees

Successful Wintering Important Factor In Canadian Beekeeping

On account of our long winters the successful wintering of bees is an important factor in Canadian beekeeping. This can be easily done when one knows how and the proper procedure is described in a bulletin on Wintering Bees available at the Publications Branch of the Department of Agriculture at Ottawa. The long cold winter in most parts of Canada is not as hard on bees as might be imagined and advantage may be taken of it to give the bees a complete rest instead of having them wear themselves out with useless activity as they often do in milder climates. To live through the winter months the colonies must be well filled with young bees, be provided with an abundance of good wholesome stores to last well into the following spring, and be given sufficient protection to prevent waste of energy and life in the production of heat. To ensure sufficient young bees each colony should be headed with a prolific queen at least 6 to 8 weeks before the normal cessation of brood-rearing in the fall. The bees must be given at least 10 pounds per colony of the best grade of honey or sugar syrup in the fall before the winter cluster is formed. For outdoor wintering the cases must be large enough to hold sufficient packing and must be tight to prevent the packing from becoming wet and the apilary should be surrounded with a good windbreak. For cellar wintering the cellar must be well insulated from outdoor temperatures and kept at from 45 to 50 degrees F. The cellar must also be kept dark, fairly dry, and be well ventilated. After being placed in winter quarters the bees should not be disturbed.

The Law Comes First

Tourists Should Not Be Allowed To Ignore Traffic Rules

The regulations against reckless driving must be enforced no matter where the offender hails from.

Even in the interest of business or as a gesture of good will, we can afford to let tourists or anybody else get the idea that our traffic laws do not mean anything."

The roads are ours; we have the right to say how they shall be used and the motorist who ignores the rules laid down for the protection of the public must be dealt with no matter where his home may be.

The striking of bells on shipboard dates from the time of the half-hour glass. The bell was struck each time the glass was turned.

Simple Rules Give Protection

Ordinary Health Dictums Best Guard Against Infantile Paralysis

The recent startling outbreaks of infantile paralysis in several western cities and in some of the states across the border makes an article appearing in the October number of the magazine published by the American Medical Association of more than ordinary interest. Warnings and instructions for protecting children against the dreaded disease are given. It says in part:

"The nature of the germ causing the disease is not known. It is thought the disease is directly transmissible from person to person."

"The nose and throat are known to contain the germ. The incubation period is from three to fourteen days usually about seven days. The disease starts abruptly with fever and often nausea and vomiting. This stage lasts a few days and then paralysis appears."

"In order to guard against this disease one should, first of all, avoid taking children into sections where it is known to exist. It is a wise rule not to allow them to play with other children but to keep them in the sunshine of their own back yard."

"Mothers should be particularly careful of their children's diet just now and see to it that it includes plenty of vegetables and milk to build up resistance to disease germs. All food that is eaten raw should be well washed, and protected from flies. It is important to observe every rule of cleanliness."

Here we have little more than the ordinary rules of health—diet, sunshine, cleanliness. There is no royal road to health for even in the great emergencies the simple rules are the important ones.

Soviet Women Will Fight If Necessary

Would Take Place Beside Men Says War Minister

Any power attempting to invade Soviet Russia will find the women of the Soviet fighting alongside the men, Mr. Torschloff declares.

Addressing the opening of a women's proletarian congress in the Grand Theatre at Moscow, the war minister said that in the event of an invasion the women would be mobilized and trained in military camps and they would take their places beside the men in the battle field if necessary.

The congress is considering reforms to improve the women's lot throughout the Soviet Union.

Enough heat comes from the sun each day to melt a cake of ice, 5,000 feet thick.

Titled Farmers Till Canadian Prairies

Western Canada is becoming very popular with lords and ladies of high rank. From England, from France, from Denmark, and from Hungary—to say nothing of Canadian nobles, they are drifting to the prairies of Alberta and Saskatchewan to prosper on farms or ranches.

Everyone knows, of course, that the Prince of Wales has a large ranch in Alberta, stocked with thoroughbred colts, sheep and a pig. But everyone does not know that along the shores of the Saskatchewan River at Fort Saskatchewan a twelve room house of graceful architecture and modern throughout has been built on a ranch covering a thousand acres where Lord and Lady Rodney, with their family,

have decided to spend the rest of their lives, with occasional trips, of course, back to England to visit their friends and relatives. Before undertaking to run the ranch, however, both of them "threw out" as farm hands on a neighboring ranch until they knew something of conditions which homesteads on the prairies are obliged to meet. Now they are not only successfully running their own large farm, but friends in the nobility of England have sent out their promising sons to train under Lord Rodney before they, too, buy their own ranches.

One of France's wealthiest noblemen, the handsome Duc de Neumours, who attended the annual ride of the Trail Riders of the Canadian Rockies this summer, was so fascinated with the country round Banff and the Yoho Valley that, he is reported to have bought some property and intends to return again next summer. Prince Eric of Denmark, whose marriage to one of Canada's best known society girls was an event much heralded, has expressed his intention of following the example of the Prince of Wales.

Little son, John, although only eight years of age, helps his father round the farm and helps him to be an excellent farmer before he is out of his teens.

One of France's wealthiest noblemen, the handsome Duc de Neumours, who attended the annual ride of the Trail Riders of the Canadian Rockies this summer, was so fascinated with the country round Banff and the Yoho Valley that, he is reported to have bought some property and intends to return again next summer. Prince Eric of Denmark, whose marriage to one of Canada's best known society girls was an event much heralded, has expressed his intention of following the example of the Prince of Wales.

Have Very Different Goals

Invention Usually Has a Motive, But Discoverer Is Urged By Curiosity

The inventor is always endeavoring to attain some practical end, whilst a discoverer by intent, is generally moved solely by curiosity. Not infrequently, no doubt, the inventor makes discoveries for the most part unwelcome and disconcerting, in the course of practicing his ideas. The discoverer seldom reaps much material benefit from his labors, but this also holds true of the great majority of inventors. The few who attain success, in this case of the term, generally purchase it very dearly at the cost of many anxious days and sleepless nights. Financial worries pile themselves on top of unforeseen technical difficulties. Partners and associates become depressed and discouraged. They are the abandonment of any further attempt to make the steam turbine a mechanical and commercial success. It is said that the original partners of Sir Charles Parsons in insisting on the abandonment of any further attempt to make the steam turbine a mechanical and commercial success, assured him that he would never make a penny out of his idea. Discoverer, it will be remembered, proposed in the first instance that his steel process should be developed by firms already engaged in the trade, working under license. These, however, failed to overcome certain technical difficulties, and after experimenting a few weeks or months declared the process to be valueless. Parsons had accordingly to start a steel works of his own. Another instance proving how lightly promising new ideas are discarded by those having no personal interest at stake was cited by Sir James Henderson, who records that the first Barr and Stroud rangefinder was rejected by the army because the first instrument made had no provision for protecting it from the sun. Owing to pressure of time the inventors had not had a chance to test the instrument thoroughly before submitting it for approval, but this done, they were offered no chance of putting the matter right. It may safely be said that no invention ever came from its originator's hands. Provision may be made for what is thought to be every possible contingency, but when the new device is entrusted to alien hands the apparently impossible seems at times to happen. An instance of this was provided by the Lee-Metford rifle, which the committee responsible for it believed they had rendered fool-proof. They had, they thought, submitted it to every conceivable test of reliability, yet Mr. Tommy Atkins quickly demonstrated that they had not exhausted the possibilities of the situation and that he could go one better.

So far as we know, no government department has ever been responsible for any fundamental improvement in any branch of science or art. In recent years hopes and anticipations ran high in certain political circles, that the great national wireless station at Rugby was going to demonstrate once and for all the superiority of public over private enterprise. The most that can now be said for this station is that it represents quite a good piece of work but its designers and engineers have made no contribution of fundamental importance to their art. Indeed, there seems a possibility that the station may prove a white elephant. The beam system, which originated with a private company, takes but a fraction of the power to cover equal distances, and it is the American engineers attached to the Western Union Company who have practiced transatlantic telephony, —Engineering, London.

Mecca Becoming Modern

Islam's Holy City Is Being Paved With Concrete

Mecca is being modernized, according to advice received from Islam's holy city. The space around Kaashah, the central shrine of the great mosque, around which tramp thousands of pilgrims, is being paved with concrete and a pump has been built over the sacred well of Zemzem which provides water for building purposes. In addition, the roads toward Mecca are being surfaced for motor traffic.

Tobacco Growing In Manitoba

Experiments conducted at Morden, Manitoba, in tobacco growing during the past summer are considered to have been entirely successful in view of adverse weather conditions experienced. All indications point to the probability of an early satisfactory production under normal circumstances.

John L. Sullivan held the heavyweight boxing championship longer than any other fighter—from 1922 to 1902.

Travelers Should Carry Cuticura

Daily use of the Soap and Ointment removes the dust and grime of travel, allays irritation, redness and roughness of the face and hands, and keeps the skin soft and clear under all conditions of exposure. Cuticura Talcum is fragrant, cooling and refreshing, an ideal toilet powder.

Sample Soap Free by Mail. Address: Canadian Dispensary, Ltd., Montreal. Price, 50c per box. Cuticura Shaving Stick 25c.

PAINTED FIRES

COPYRIGHT, CANADA, 1925

CHAPTER IX.—Continued.

The door of the common room opened quietly. The light was switched on, and Mrs. Wymuth in dishevelled night clothes stood blinking like an owl at the light. Helmi stood at the window facing her, unafraid and calm.

Mrs. Wymuth had a sudden plan. Helmi had come back to the scene—she was frightened—now was the time.

"I came the glass to pick up," said Helmi, in a whisper. "I hope he is not hurt bad."

"He is dead," said Mrs. Wymuth, in a voice as hollow as an empty church. "Oh, Helmi, you have killed him, killed him by your blow. He is lying now cold in death."

Dead! The room swam past Helmi, table—chairs—door. Dead! The word beat like a drum with every beat of her heart. Dead! Dead! Dead! Murmur! Murmur!

The red word danced before her eyes.

"Helmi, the police will come for you. I will have to send for them—I will have to tell them you struck him down. Listen, Helmi, tell me now who was it sent you for the doctor? I'll save you, Helmi, even now, if you'll say the name."

Terror had frozen Helmi's blood. She knew how awful a thing it was to kill—people who kill are hanged! She looked and unlocked her hands.

"Just say the name, Helmi, and I'll save you—just the name."

For the moment Helmi could not remove her mind from the terrible present. Then she remembered. She began to speak mechanically.

"It was—I then she stopped abruptly. Her mouth—she had sworn!

A deafening clanging outside drowned her words, the slanging scream of a fire-engine that raced by rocking from side to side.

"Who was it, Helmi, dear—speak the name—I will save you." Mrs. Wymuth came closer, fawning terribly.

"Helmi! I will tell them you did not mean it. Just tell me who sent you. They will hang you, Helmi, and you so young. But tell me, Helmi, dear, and I will be your friend—tell me, Helmi."

Helmi drew back, irresolute. There was a step in the hall, quick, impatient; then a voice.

"What the devil are you doing in there at this time of night?"

Mr. Wymuth came into the room. With a small piece of coat plaster on his cheek, the only sign of the accident, stood the alleged corpse in a faded brown dressing-gown, his big

RUN-DOWN AFTER BIRTH OF BABY

Ottawa Woman Made Strong by Taking Lydia E. Pinkham's Vegetable Compound

Ottawa, Ontario.—"I was terribly run-down after the birth of my third baby. I had awful bearing-down pains and was afraid I had serious trouble. I was tired all the time and had no appetite. My sister-in-law is taking Lydia E. Pinkham's Vegetable Compound and cannot praise it too highly, and asked me to try it. I have had splendid results and feel fine all the time now. Any one who needs a thorough pick-me-up soon learns from me what to take."—Mrs. EDITH FAIRBANK, 312 Cumberland Street, Ottawa, Ontario.

Terrible Backache

Hamilton, Ont.—"After my baby was born I had terrible backache and headaches. I could not do my work and felt tired from the first minute I got up. But worst of all were the pains in my sides when I moved about. I had to sit or lie down for a while afterwards. I could keep my house in order, but many things had to go undone at the time, because of my ailments. I was told by a neighbor to take Lydia E. Pinkham's Vegetable Compound, as she said it would help me up. I was relieved before I had taken the first few bottles and have not had any trouble like it since."—Mrs. T. MAURICE, 60 Burton Street, Hamilton, Ontario.

W. N. L. 1763

and deeply interested in her own mental experiences, began to feel that the episode of Helmi was a providential thing, inasmuch as it was bringing her and her husband closer together, and under the stimulus of this belief she redoubled her efforts to please him. She went to church with him; she joined some of the women's societies. Eva was not unmindful of the benefit she would receive socially from these afflictions. It pleased her, too, to find what a flutter of pleasure her coming made in the sequestered. Any way, it was good policy to make her social position as secure as possible, and if Helmi did accuse her it would be easier. Through all of Eva's plans there ran one cool purpose, yet she managed to keep her conscience clear as the noonday sun. She had mastered the art of self-deception.

Following out her plan to establish a business record and an inviolable social one, it occurred to Eva that it might be well for her to show an interest in the Girls' Friendly Home. It would show to the world that although the young Finnish girl had treated her badly there was no room in her noble heart for resentment. She glowed with the thought. Having put her hand to the plow she would not turn back.

Miss Abble was delighted when she heard that Mrs. St. John thought of going out to see the girls, and not only that but was going to give a tea for the Home. She reported this to Mrs. Wymuth the Sunday following, when paying her weekly visits to the Home. It was used by Mrs. Wymuth in her turn, not only to show the girls how grateful they should be for food, shelter, clothing, and the blessings of the gospel, but also for kind friends to think of them. Mrs. Wymuth's tongue dripped honey, when she made the announcement to the girls.

(To Be Continued.)

Souvenirs Of Canada

Buffalo Robes Presented To Prince Of Wales, Prince George, and Premier Baldwin

Among the most interesting souvenirs of Canada carried back to England by the Prince of Wales, Prince George, and Premier Baldwin, were three magnificent buffalo robes from the National Buffalo Park at Watnig, Alberta.

The robes, which were mounted as floor rugs, were each superb specimens of their kind and were presented to the distinguished visitors during their visit to Calgary by the Hon. Charles Stewart, Minister of the Interior, whose department is charged with the administration of the national herds in Alberta and the far North.

As an expression of the spirit of the Canadian West, probably no more appropriate or interesting gifts could have been chosen in the early days of exploration and pioneer settlement of the prairies the buffalo played an indispensable part.

The romance of its tragic disappearance, and of its rescue when on the verge of extinction, through the efforts of the Government, form a story probably unequalled in the history of any other of the great quadrupeds. It is not the least gratifying feature of the success attending the development of the national herds that the buffalo robe, which is unsurpassed among pelts for combined size, durability and beauty, is once more becoming available in limited numbers.

A Heavy Handicap

A certain big game hunter, who was contemplating a trip to Africa, called at a sporting goods store and bought a large quantity of cartridges.

"I usually deal with your head office," he remarked to the man in charge. But I dare say you will be able to send these for me?"

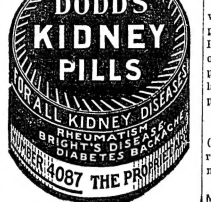

"Certainly, sir."

"Well, I want them to go to Nigeria."

The other looked blank for a minute or so, then:

"I think you'd better give the order to your head office, sir," he ventured. "You see, we've only a small boy with a bicycle here."

A rainbow sometimes may be seen all day long in a cloudless sky in Siberia. It is said to be due to reflection of the sun on fine particles of snow in the air.

Cuts-Burns

Vicks' healing, antiseptic ingredients bring soothing relief. Apply gently. VICKS' VAPORUB OVER 21 MILLION SALES IN 10 YEARS

House Moved Eighty Miles

Built in 14th Century Has Been Erected Near London

A large Tudor house—oak beams, bricks, and tiles—has been moved 80 miles from a Suffolk village and reconstructed on the outskirts of London.

This 14th century building, which has had such an adventure after centuries of peace, formerly stood in the village street at Billesdon, about 10 miles west of Ipswich. After it had been unoccupied some little time its owner approached a firm of estate agents and asked them to sell it for him. The agents suggested that it should be dismantled and reassembled near London, where it was more likely to obtain a good price. The owner agreed, and the demolition began.

Describing how the house was moved, the estate agents who are acting for the owner, said:

"We spent a fortnight making a detailed plan of the house, which was then taken to pieces. Each oak beam was numbered as it was removed."

"One beam weighed about a ton. Nearly all of the others weighed more than half a ton. The demolition took about a month and the site for its re-erection was selected near Chigwell, Essex."

"The pieces were taken by road in 100 motor-lorry loads. All the timbers were laid around the site and, working according to plan, the carpenters re-erected them as the original carpenters must have done centuries ago."

The freehold price of the house, which stands in about 7 acres of land, and will have an electric lighting plant, is £4,500.

One Crop Buys Farm

Remarkable Success Of New Settler On Lethbridge Irrigation Tract

Here is the report of the first new settler on the Lethbridge Northern Irrigation tract to complete harvesting this year: Saunders Bros., of Iron Springs, purchased quarter section here last July paying \$1,800.80, one-third crop to go to Lethbridge Northern as purchase price. Broke land in August. Seeded to spring wheat 140 acres. Harvest concluded, all wheat in elevator. Total crop 4,531 bushels. Grade No. 1. Offer for wheat total \$135 per bushel net to owner.

From this total value \$2,000, which means that the Lethbridge Northern, if it sells the wheat total, will have to return \$105.20 to Saunders Bros., being the excess which one-third of the crop brought over purchase price of land. This crop was cut and harvested with a combine and the grain graded a perfect No. 1 direct from the machine.

Term Now Complimentary

Canada is Proud To Be Called "Modern Country"

In the fourth quarter of the last century people when they desired to be uncomplimentary, called Canada a "wooden country" referring of course to the widespread use of wood in the construction of buildings, bridges, sidewalks, pavements, etc.

Today statesmen and economists, with far different feelings, describe the Dominion as the "softwoods storehouse of the Empire" and urge all Canadians from patriotic as well as from business motives to conserve and utilize this great resource with which a beneficent Providence has endowed the land.

Style Not Included

Bloomer—"I'd like to know why you never make any bed. I've been here three weeks and it hasn't been made yet!"

Landlady—"If yer thought this was one of them stylish places yer've made a mistake! If yer don't like it, you highbrow, yer can get out!"

Smallest Portrait Disappears

Scotland Yard is seeking the world's tiniest portrait, which disappeared from an exhibition of the Royal Photographic Society. It is that of Nice, inventor of an early day photographic process. It requires enlargement 150,000 times to make a picture the size of a half dollar.

Pretty bather in apparent distress (to bald-headed man swimming to her rescue)—"Go away, you aren't the man!"

Minard's Liniment for Asthma.

Had Thrilling Trip

Girl Member Of Trader Crew Returns After Voyage To South Seas

A proposal of marriage from a cannibal chief in the New Hebrides and a score of other adventures in the South Seas were part of the story of a girl who returned to her home in New York after a runaway trip to sea.

The girl, Viola Irene Cooper, a member of a trader crew that included Malays, Arabs, Fijians, Portuguese and French men, stood watch and ate shark fins as regularly as the most able bodied seaman in the realization of a dream inspired by reading the sea stories of Stevenson, Conrad and Melville.

Miss Cooper, shipped from San Francisco with a friend, Jean Schoen. The girls had considerable difficulty getting jobs, but a kindly captain finally hired them and away they went on a cruise to the romantic lands they had long desired to see.

"We were treated courteously by every one we met," reports Miss Cooper. "I was only scared once, and that was by the cannibal chief. He pinched my arm and said 'You belong to me,' and I did not know whether he wanted to marry me or eat me. But we were good friends after that, and he promised me a copra island if I would send him a silk hat and a cutaway coat. I promised I would."

Little Helps For This Week

For we are saved by hope.—Romans viii. 24.

And do not fear to hope. Can poet's brain More than the Father's heart rich good invent? Each time we smell the autumn's dying scent.

We know the primrose time will come again.

Not more we hope, nor less would soothe our pain.

—George MacDonald.

"We should hope" for everything that is good," says the old poet Linus, because there is nothing which may not be hoped for, and nothing but what the gods are able to give us. Hope quickens all the still parts of life, and keeps the mind awake in her most remote and indolent hours. It gives habit tenacity and good humor; it is a kind of vital heat in the soul that cheers and gladdens her when she does not attend to it. It makes pain easy and labor pleasant.

—Joseph Addison.

Minard's Liniment for Lumbago.

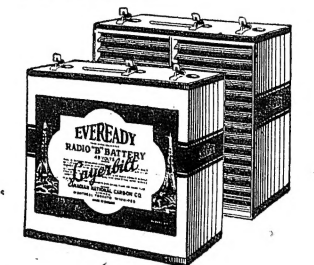

She (anxious to impress)—"I've just put my furs into cold storage." He—"Cold storage! Ah, that's jolly good; never heard it called that before. My cuff links and watch are there, too."

Nervous Passenger—"If I was cut off on one side by fire how on earth could I escape from this upper berth?"

Porter—"In that case, sah, all you'd have to do would be lightly yo'self and ooze through de ventilator."

It's All Battery!

The radically different method of construction used in the Eveready Layerbilt "B" Battery fills every square inch of space solid with current-producing materials, giving the longest life of any "B" Battery ever made.

No other battery is like it. Only Eveready makes it. To get the longest hours of service—use it. Your Radio dealer will recommend the Layerbilt for all heavy-duty receivers. Buy it for economy.

RADIO IS BETTER WITH BATTERY POWER

Increasing The Value of Canada's Fur Resources

There are thousands of trappers in Canada and all of them are engaged at one time or another during the winter season in taking the pelts of wild fur-bearers. There is hardly a farm, village or a town in Canada that has not got its trapper or fur trader. Millions of dollars are distributed each year among these persons as a result of the disposal of Canada's annual raw fur catch. Last year it had a value of \$15,072,244. A very considerable increase in the yearly value would be made possible were proper methods of pelt handling more widely known.

Too many trappers think that ones they have taken a skin nothing else remains to be done. Amateur and farmer trappers, which form more than half of the trapping fraternity, are the chief losers through their lack of knowledge in the handling of raw pelts as poorly prepared pelts bring much lower prices than those which have been properly prepared. Leading fur authorities have stressed the fact that in many cases up to one half of the pelts coming to the raw fur markets fall into the unprofitable class and that every year there is a tremendous loss in pelt values that could be prevented. The loss, however, is not confined to the careless trappers, but affects the whole fur industry and lowers the value of both the raw and finished product.

With a view to improving this condition and making possible a wider knowledge of the essentials necessary to the proper skinning, stretching and drying of raw pelts, a monograph entitled "The Preparation of Pelts for the Market" has been prepared by the Department of the Interior. This monograph will be sent free of charge on request to the Director, Natural Resources Intelligence Service, Department of the Interior, Ottawa, Canada.

Potatoes Average Nearly

Two Pounds Apiece Here

Talk about crops? It is not only in wheat that the Youngstown district this year is producing bumper yields, but the garden stuff also is producing at record rates. A sample of potatoes, grown on the farm of Ernie Edwards, of Reist, was on display this week in Sterling's store that excels anything that has yet come to our notice. An even dozen of the tubers weighed 23 3/4 lbs., the largest one weighing 2 lbs. 7 oz. Mr. Edwards also raised, in addition to a long list of other garden produce, a number of large pumpkins.—Youngstown Plaindealer.

Permits are still being required under the provincial health board's order as to children under 18 years removing from one district to another in Alberta, according to R. B. Owens, assistant deputy minister of health. This regulation provides that children under the age stated, coming from a district where there has been infantile paralysis, cannot enter into another district without the consent of the health authorities in the district it is proposed to enter.

A license for a public customs harbor has been granted to the city of Lethbridge, according to an announcement from Col. J. L. Ralston, Minister of National Defence, Ottawa. The Department of National Revenue has concurred in the issue of the customs air harbor license in order to provide facilities for the entry of aircraft from the United States into Southern Alberta. Lethbridge is the second city in Alberta to take this important step, Edmonton having already obtained a license for a municipal air harbor.

GET A SLOGAN

Why did the prodigal son return to his father's home? Why do so many people who leave Chinook come back? Why did so many more who have not yet arrived wish that they were here? The answer to all those is that they haven't found any place so good. As a safe prophecy we declare that the next year is going to see the return of many former citizens. Watch and see.

Our district has had some of the hardest hard times that one man ever told another man about. We are absolutely sure that the worst of these are over, the age of permanent prosperity has dawned. We are going to know better times than we have ever known. Those who have had faith in our district are real heroes and are just about to reap their reward in seeing the fulfillment of their dreams. Chinook at one time threatened to beat the original deserted village, now look at it! Notice the change of expression on the people's faces? Almost gone are the old familiar hard luck gabfests, people now have something else to talk about. That was one of the first things we noticed after our return. Oh just think what a town this is going to be when all the fighters in this town have had a little time to start building up real community with prosperity as material in place of hard times.

What's in a slogan? Does a slogan mean anything? Can a slogan help you? Have you a slogan?

We can answer all but the last one. Here is our opinion. Is it yours? A slogan is an aim to strive for, an advertisement of your own personal idea about your own business. Does the caption Jim Green Garage convey any hint of what kind of work you might expect from this establishment? Which draws more trade, the above or Service Garage?

A good slogan is something to strive for because who could in his dealings belie his motto?

Do these slogans mean anything to you? The flavor lasts. Hasn't scratched yet. The most beautiful car in America built, body, brain and nerves. Babies cry for—and others too numerous to list. These products as well as thousands of others have become what they are very largely by the adoption of a slogan that was in itself a goal to shoot for.

If you haven't one get one. Be sure it embodies your acme of performance then tell the whole world about it. As a great man once said REPETITION IS REPUTATION and REPUTATION IS REPETITION. Ain't it a fact.

Two-Minute Silence On Armistice Day

The following announcement was issued by the prime minister at Ottawa last Thursday afternoon, with respect to Armistice Day observation:

"In accordance with arrangements for the observance of Armistice Day, sanctioned by His Majesty the King, the people of Canada are invited to mark the occasion by a two minute silence at 11 o'clock on Friday morning November 11, 1927. This is a special observance suggested by His Majesty and is in addition to the regular celebration of the date recognized by the Canadian parliament for the Monday previous.

About 1000 miner at Drumphell went on strike Monday, supporting the demand of the Canadian Mine Workers' Union for recognition, but the walkout so far has been orderly, and miners and operators are "standing pat."

The School Column

The teachers of the Oyen Inspectorate will hold their convention at Chinook on November 3rd and 4th.

The School Literary held its usual meeting Friday afternoon. The following was the program: Opening Song: "O Canada" Minutes of last meeting read and approved.

Song, "Hi, diddle, Hi, diddle," by the boys and girls
Recitation: Ina Rennie.
Song: Norman Jacques
Critics remarks: Mr. Korek.
National Anthem.
The Programme, with the exception of the last number, was put on by the pupils of Mr. Steckle's room.

Cooley Bros. have sold 24 Fordson Trucks this season.

Mr. Lorne Cole purchased a Fordson Truck from Cooley Bros

Miss Cameron, of Everett, Alberta, is visiting at the home of Mrs. L. Cooley.

Mr. T. J. Shaw, of Cere, purchased a Fordson Tractor from Cooley Bros. this week.

Constable F. E. Torpey, A.P.P. of Youngstown, was registered at the Acadia Hotel yesterday. Constable Torpey took one of the local Chinamen to Cereal where he is being tried today on a charge of running a gaming house.

The marriage took place at Hanna on September 30th of Miss Jean White, daughter of Mr. and Mrs. Geo. White, Chinook, and Mr. Clifford Collins, of Ontario. The young couple will make their home at Little Currant, Ontario

Mr. Ira D. Barton, of Big Stone met with a serious accident while riding a horse yesterday. He was thrown from the horse, and the flesh on one of his legs was badly lacerated. Mr. Barton went to the hospital at Cereal this morning to have the wound attended. As far as we have heard, no bones were broken.

Threshing outfits have been humming busily for the past week in all parts of the province and good progress has been made in the work. The warm sun and winds are drying out the grain in excellent fashion, and about all the wheat delivered at the local elevators this week is grading high. A few more weeks of this weather will see all threshing finished.

Lawyer (to witness): "Did you say that an incompetent man could keep an hotel just as well as anybody?" Witness: "No; I said an inn experienced man could."

The Editor

The Editor, he sits around And wonders what to write; He's got to think up something good, But not to start a fight. The Editor, he wants the dope; He wants the news and stuff; Most any little joke will do, Tho, it mustn't be too rough. The Editor, he wants to know When folks go for a frolic; 'Bout marriages (or even dates!) Or a cure for baby's colic; Promotions, transfers, and the like And what's become of 'Jiminnie'; And for anything original, Why, say, his name is 'Gimmie' The Editor, he sits around And wonders what to write; He looks for news the whole day long, And prays for it at night, Well, let's all help the Editor With the contribution stuff, Let's deluge him with newsy news Until he cries "E-N-O-U-G-H!"

ANONYMOUS.

Here and There

To meet the increased activity in aviation the Royal Canadian Air Force will be equipped with 25 new planes, according to information given out at Ottawa recently.

The Canadian Pacific Railway Company has decided to give the name of Princess Elaine to the new vessel building in Scotland for the Vancouver-Nanaimo route, at a cost of \$1,500,000.

To handle the heavy prospective movement of grain this year the Canadian Pacific Railway have opened the Transcona yards at Winnipeg and the new double track between Molson and Whittier Junction.

Some idea of the increase in the volume of traffic through the port of Vancouver is given by the fact that during the past year exports from that port were valued at \$149,000,000 as compared with \$88,000,000 five years ago.

The winter carnival at Banff is to be held from February 4 to 11 this year, according to L. C. Orr, president of the Banff Winter Sports Association. Preparations are under way that give promise of a greater carnival than ever staged at this famous mountain resort.

An exceptional crop of blueberries has been gathered this season, according to the agent of the Canadian Pacific Express Company at Kenora, 324,767 pounds having passed through his hands to date, and approximately 30,000 pounds being shipped over the lakes to the United States. The estimated value of the total shipment is placed at about \$38,000.

The names of Nuneevoo and Coll, who sought to fly the Atlantic but failed, will live forever in the place names of Canada. The topographical survey, department of the Interior, has issued a new map of the world bearing across in the vicinity of Western Norway and Birch Lakes in northwestern Ontario. The names of these two aviators from France have been given to two lakes.

E. W. Batty, chairman and president of the Canadian Pacific Railway, has announced in a telegram to H. R. Silver, president of the Lord Nelson Hotel Co., at Halifax, that the railway company has decided to subscribe to the extent of \$350,000 in financing the hotel. Construction of a \$1,250,000 hotel building will commence immediately.

Canada's "Agricultural Jubilee" is to be celebrated this year according to an announcement made by the Hon. W. R. Motherwell, minister of agriculture, who has laid this matter up with various provinces. It has been decided to hold the celebration in connection with the Royal Winter Fair at Toronto, November 16 to 24 as the new building erected there jointly by the Dominion and Ontario Governments offers a splendid setting for this event.

In spite of the milk embargo Canada's export of milk and cream to the United States have been well above the average this year, according to Washington figures. The total exports of milk and cream, chiefly the latter, show an increase of 34,000 gallons during the seven months period January to July. The exact figures, 1,096,798 gallons compare favorably with 1,062,756 gallons in 1926 and 1,055,161 gallons in 1925.

THE COW

Is the Best Investment a Farmer Can Make. A Good Cow, given a fair chance, Will Produce 250 Pounds of Butter Fat in Nine Months, and this at a price of 30 cents per pound, Equals \$75.00 a year. What else can you invest in that will pay you 100 per cent every year? And she gets at least half of her living out of the fence corners, stubble fields and sloughs that would otherwise be a total waste.
